Data Hosted by Strategic Consulting International Published On The USGS National Map

Press Release

Tulsa, Oklahoma – June 10, 2005 – Data hosted by Strategic Consulting International, Inc (SCI), one of the leading providers of GIS in the United States and 2005 ESRI Business Partner of the Year, has been published on The National Map. SCI is one of the first private sector companies to partner with the U.S. Geological Survey on the National Map, providing 2003 1-meter Aerial Photography, 1995 1-meter B&W Aerial Photography, and 24K USGS Topographical Maps to the project.

“SCI believes that our clients' data, as well as internal data that is developed through the course of our consultancy, can be valuable at the national level.” states David Lowther, Senior Software Engineer for SCI. “As an initial private sector contributor, SCI hopes to work with the USGS to define future guidelines for private sector National Map partners and be a model in this regard.”

About Strategic Consulting International

Headquartered in Tulsa, OK, SCI is a full service consulting firm providing services to public and private sector clients in the following areas: Geographic Information Systems (GIS), Information Management, Internet Support, Global Positioning System (GPS), and Program Management.
