8th Annual  
Oklahoma SCAUG Conference

October 6th, 2005  
3rd - 5th Local GIS Training Courses

Moore Norman Technology Center  
4701 12th Ave NW  
Norman, OK

---

Agenda

7:30 am ............Registration  
8:00 am ............Opening Breakfast with Keynote Speaker  
11:00 am ............User Presentations  
12:30 pm.............Lunch / Poster Competition  
2:00 pm.............ESRI Technical Sessions  
4:30 pm.............Closing Remarks / Door Prizes

---

GIS Related Training Courses

ArcGIS, Introduction  
Global Positioning Systems (GPS), Introduction  
Building Geodatabases I

---

ESRI Technical Sessions

---

User Presentations

---

Poster Presentations

---

If you have questions or need more information please feel free to contact anyone on the steering committee.
Please Print Clearly! Only 1 Attendee per Form

Membership Includes
- Subscription to ArcFiles newsletter
- Access to online Digital Resources Guide
- Discounted ESRI training (at Regional Conferences)
- Participate in salary surveys & job postings
- Great way to network with other GIS professionals

YES, Include me in SCAUG’s online Digital Resource Guide
No, Please don’t include me

The South Central Arc User Group is a non-profit organization dedicated to benefiting users of ESRI Geographic Information System (GIS) software in Texas, Oklahoma, Louisiana, Mississippi, Puerto Rico & The Cayman Islands.

Check One:  ___ New Member

GIS Experience:  ___ Beginner
                 ___ Intermediate
                 ___ Advanced

Which ESRI products do you use? Check all that apply.
___ ArcInfo     ___ ArcPress     ___ Survey Analyst
___ ArcEditor   ___ MapObjects   ___ Tracking Analyst
___ ArcView 9.x ___ ArcObjects   ___ Military Analyst
___ ArcView 8.x ___ ArcPublisher ___ ArcScan
___ ArcView 3.x ___ ArcReader     ___ MrSID Encoder (ArcGIS)
___ ArcSDE       ___ Spatial Analyst ___ StreetMap
___ ArcIMS       ___ 3D Analyst   ___ ___
___ ArcPad       ___ Geospatial Analyst ___ ___

Oklahoma SCAUG Training
___ ArcGIS, Introduction
   3 Days - $350/Participant
___ Global Positioning Systems (GPS), Introduction
   3 Days - $350/Participant
___ Building Geodatabases I
   3 Days - $1150/Participant

Oklahoma Conference Dues
___ $30 Current Member or Student
___ $60 Conference + Membership
___ Corporate (Contact Shellie Willoughby)
___ Enterprise (Contact Shellie Willoughby)

Late Registration after Sept 14, 2005
___ $50 Member or Student
___ $80 Non-member

Conferences Registration Required for Training
Contact Shellie Willoughby if you require special accommodations (Hearing, Vision, etc.)

(Corporate & Enterprise memberships please provide a membership form for each individual applicant)

**8th Annual SCAUG Training Classes**

Local GIS Training
Discounted ESRI Classes

---

**ArcGIS, Introduction** .............................................................................................................. 3 days - $350.00 per participant

New to ArcView 9.x and GIS? This class is designed with the beginner in mind, covering GIS basics as well as using geographic data to create maps and conduct analysis. You’ll also learn the unique language of ArcView 9.1 and how to use the major components of the software - ArcMap, ArcCatalog, and ArcToolbox.

Prerequisites: None

---

**Global Positioning Systems (GPS), Introduction** ................................................................. 3 days - $350.00 per participant

Participants will learn what a GPS is and how it works. Additionally, the course covers: types of services and systems on the market, discussion of precision and sources of error, and surveys the techniques for using GPS and field data collection. Students will spend time outdoors using GPS receivers and gain useful information for finding a GPS unit that fits their needs and budget.

Prerequisites: None

---

**Building Geodatabases I** ...................................................................................................... 3 days - $1150.00 per participant

Discover the capabilities of the geodatabase and how to migrate existing GIS data to build a geodatabase for ArcGIS 9. This course addresses managing vector and raster data in the geodatabase; building and maintaining a geodatabase topology; maintaining data integrity through subtypes, attribute domains, and relationship classes; and sharing geodatabase schema with XML. Participants learn how to create, use, edit, and manage spatial and attribute data stored in the geodatabase. This course examines the differences between a personal and enterprise geodatabase, and introduces ArcSDE architecture. This course is taught using the ArcInfo license of ArcGIS, since the configuration of many of the advanced features of the geodatabase requires either ArcEditor or a higher license of ArcGIS.

Prerequisites: Introduction to ArcGIS 1 & Introduction to ArcGIS 2 or equivalent knowledge

---
