Questions may be directed to Kay Arbenz at 918-481-0034 or karbenz@scigis.com

GEOGRAPHIC INFORMATION SYSTEMS TECHNICIAN

BASIC PURPOSE:
The GIS Technician will be responsible for gathering and tracking geographical information and for developing and maintaining geographic information systems (GIS) databases and data sets. This includes reading and interpreting source documents and entering required data into the GIS. These individuals will also produce maps and provide technical assistance to staff and customers.

TYPICAL FUNCTIONS:
The functions carried out by the GIS Technician will vary but may include the following:

- Operates computer workstation to create and update maps using appropriate software as data is received relative to various geographical matters and projects.

- Handles data entry and other routine tasks as assigned by supervisor.

- Conducts mapping research, in the field and in the office, to resolve conflicting information and ensure the accuracy of the data; verifies map information and makes changes as deemed appropriate according to needs of the project.

- Creates and modifies maps using GIS/CADD software, as directed.

KNOWLEDGE, SKILLS AND ABILITIES:
The knowledge, skills and abilities required for this position include a working knowledge of the symbols and terminology used in conveying geographical information, a familiarity with ESRI software including ArcGIS; digitizing and data manipulation procedures for geographic information systems and some working knowledge of database design. Candidate should be able to gather mapping information in the field using current equipment and be able to read and use different types of maps and should be able to perform mathematical calculations using algebra, geometry, and trigonometry. Additionally, candidate should be able to communicate both orally and in writing with customers, clients, and the public and to establish and maintain effective,
professional working relationships with others.

**EDUCATION AND EXPERIENCE:**
The education and experience required for this position consists of an Associate's degree or equivalent course work at a technical or vocational school, in geographic information systems, geography, planning, landscape architecture, civil engineering, computer science, or a related field; or an equivalent combination of education and experience.

**ABOUT SCI:**
Strategic Consulting International is a full service consulting firm providing services to public and private sector clients in the following areas: Geographic Information Systems (GIS), Information Management, Internet Support, Global Positioning System (GPS), and Program Management.

In business since 1997, SCI has proven to be one of the leading providers of GIS in the United States. SCI offers a full range of services, from initial feasibility studies through application and database development to full implementation and systems management.

SCI is an ESRI certified reseller and developer and was named an ESRI Business Partner of the Year in 2005.

**SALARY AND BENEFITS:**
Salary commensurate with experience and education. SCI benefits include healthcare, dental, vacation and sick pay.
